service overview ↘

Secure, Flexible, and Comprehensive Data Protection

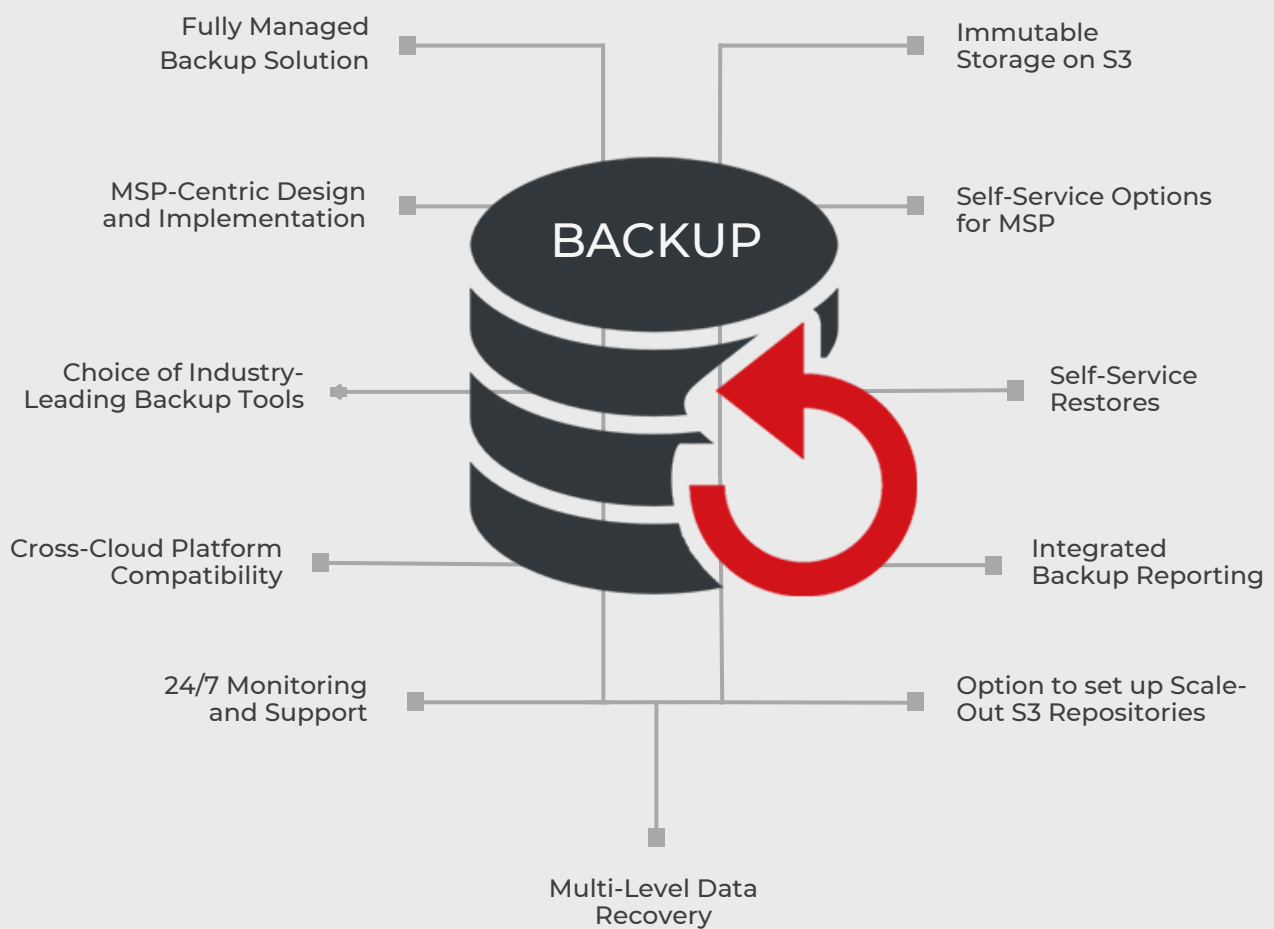

Our Backup as a Service is designed with MSPs in mind, offering cross-cloud platform compatibility and a subscription-based model, eliminating the need for upfront investments or long-term commitments.

We provide MSPs with the flexibility to choose their preferred backup tools while we handle implementation, monitoring, and management within our cloud environment.

key features

benefits ↘

- ✓ With Backup As A Service, enjoy robust data security and integrity, reducing downtime with rapid recovery options. Our vendor-agnostic platform supports various leading backup tools, ensuring global accessibility through our cloud infrastructure.
- ✓ Manage costs predictably with our transparent pricing, eliminating the need for expensive hardware.
- ✓ Gain peace of mind with automated backups and 24/7 support, while benefiting from ease of management and scalability to meet your growing business needs.
- ✓ Ensure compliance with industry regulations and enhance team collaboration with self-service restore features."

partner use cases ↘

MANAGED SERVICE PROVIDERS

MSPs can enhance their services with our scalable cloud backup solutions, offering comprehensive data protection, secure offsite storage, and rapid recovery. This integration improves client satisfaction and strengthens their service portfolio.

INDEPENDENT SOFTWARE VENDORS

ISVs can enhance their software products by integrating our cloud backup solutions, offering built-in data protection and reliable, secure backup and recovery features for end users.

SYSTEM INTEGRATORS

System Integrators can enhance clients' IT infrastructures with Livewire Cloud's BaaS, providing robust data protection while reducing the complexity and cost of traditional backup methods.

RESELLERS

VARs can enhance their product offerings by reselling our BaaS solutions, providing clients with flexible, cost-effective data protection services. This ensures business continuity and resilience against data loss.
